

TYREseal ESSENTIAL

TPMS Safe

Works with TPMS valves

Made to OE specification

Direct replacement for the car's original tyre sealant

No tools required

No need to remove the valve core

Quick repair solution

Be on the road within 10 minutes

OSRAM TYREseal ESSENTIAL

The OSRAM TYREseal ESSENTIAL tyre sealant is a direct replacement for the car's original tyre sealant. Made to OE specification using the latest particle gel technology, the OSRAM tyre sealant will repair punctures up to 6mm and can then be driven on for up to 200km, so you are able to complete your journey or get a replacement tyre from a service centre. With no tools or jacks required, the process of repairing a punctured tyre is quick and easy and will get you back on the road within 10mins. The sealant is designed to flow through valves so it is safe to use with TPMS valves. No need to remove valve cores. The bottle is a universal design, so it can be stored with the car maker's sealant kit and is compatible with OSRAM tyre inflators and most other inflators. Once the tyre is off, the sealant can be washed out easily to allow for a permanent repair if desired. The solution is non-toxic, so when it is rinsed out, it is environmentally friendly.
